

CIRCULAR ESCAPE ROOM

#SHARETHEFUN: AN INTERACTIVE INSPIRATION SESSION

Get to know circular economy in a fun way and get to work on it right away. The sustainability of organizations goes deeper and deeper into the organization, almost everyone has to deal with it in their daily work. Would you like to reflect with your colleagues on the transition to a circular economy in a fun, interactive way? Or are you looking for another creative team building activity? The Circular Escape Room provides insight into the principles of the circular economy and makes them immediately applicable in your own life and work.

THE ESCAPE ROOM

The escape room is mobile and can be built anywhere. Like at events or just at the office! Participating teams then only need to come out from behind their desks to immerse themselves in the world of the circular economy for an hour. Through puzzles, riddles and questions, the teams work toward the final goal. They get to use everything in the room. There is even a mobile library to consult. While playing, participants learn interesting facts that stick and tips they can use to get started themselves.

ESCAPING CLIMATE CHANGE

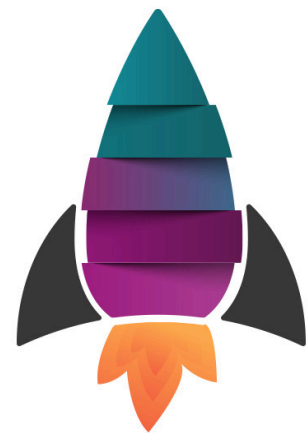

The goal of the Circular Escape Room is to escape the effects of climate change. To do this, participants must work together and think differently. All topics are covered: circular buildings, how we should deal with using products, the influence you have in your own life, the influence the government has, circular business models, circular purchasing and designing circular products and services.

ACCELERATE TOGETHER

When you come in with your team you will get a flash presentation on the circular economy, but there is no time to waste! After the introduction, the clock starts. The team has 30 minutes to solve all the issues and escape the consequences of climate change. When we have secured the future after 30 minutes, we discuss the facts we have learned. All in all, the Circular Escape Room takes one hour per session. After this we will let you go and give you the change to put the knowledge into practice.

You will leave the Circular Escape Room with:

- Facts and knowledge about the circular economy that really stick.
- Inspiring reading list.
- Tips that you can use in your own life.
- A clear call to action.

ESCAPE ROOM

The Circular Escape Room is at its best when we build it up for at least one full day. There will then be two circular experts on hand all day to take care of set-up and take down and run the sessions. You can then run as many as six sessions in one day!

- 1 hour per session
- 2 teams of 8 people per session
- 6 sessions in one day
- Is mobile and can be set up anywhere
- 2 circular economy experts
- Price: €3.250 per day or €2.350 per half-day session

PHI FACTORY

The Circular Escape Room is a product of PHI Factory. Our goal is to accelerate businesses together toward a circular economy.
